INSTRUCTIONS FOR 2010-2011 CEAL STATISTICS ONLINE SURVEY

2011 Online input/edit time frame: **October 3 through Dec. 9, 2011**

A printed copy of annual statistics will be published in the *Journal of East Asian Libraries* 2012 issue.

General Instructions:

- Definitions of the statistical categories used in this questionnaire are based on Information Services and Use: Metrics & statistics for libraries and information providers – Data Dictionary [NISO Z39.7-2004](#).
- This questionnaire assumes a fiscal year from **July 1, 2010 to June 30, 2011**.
- Please do not use decimals unless instructed otherwise. All figures should be rounded to the nearest whole number.
- Non-CJK items in this survey refer to non-CJK language materials on East Asia.
- All currencies should be converted to US dollars. Please cooperate with all branch libraries and report one combined library statistics for each institution. An exception is given for law libraries. If an appropriate entry is zero or none, use 0.
- Please use the automatic summation function supplied by the application. Leave all Subtotals and Totals BLANK, and this application will calculate the total.

CEAL Statistics Database (online forms): <http://lib.ku.edu/CEAL/php/> [login is required to access forms]

- Member access via **login**. Find your library name from the list and enter your password from last year. You can change your password once you get into your library page, and scroll down to the bottom where the Administrative Form is located. Library survey coordinators should contact Wen-ling Liu (wliu [at] indiana.edu) to obtain old password information.
- New member libraries that wish to establish accounts in order to participate in CEAL annual statistics should contact Vickie Doll (vdoll [at] @ku.edu). See instructions for new library: http://lib.ku.edu/ceal/php/info_newuser.php
- Consult Calvin Hsu (ch8xy [at] virginia.edu) for all other questions concerning forms and data input.
- FAQ for online forms can be found [here](#).
- 1957 to 2010 CEAL published stats data: <http://lib.ku.edu/ceal/stat/>

Entry Form (listed in sequence of tables published in JEAL)

Note: The application will calculate all Subtotals (bold fields) automatically if you leave them BLANK (zero "0" is not a blank value). When you change a previous input, you need to BLANK out the previous total or Subtotal for the application to re-calculate a new total. Although you can supply your own totals, it is best to use the automatic calculation feature for data integrity.

Note: Canadian currency needs to be converted into U.S. Dollars.

Serials Form

See the AACR2 (Anglo-American Cataloguing Rules) definition for serial as follows:

Serial. A bibliographic resource issued in a succession of discrete parts, usually bearing numbering, that has no predetermined conclusion. Examples of serials include journals, magazines, electronic journals, continuing directories, annual reports, newspapers, and monographic series.

Report the total number of **unique SERIAL TITLES**, NOT SUBSCRIPTIONS, that you currently acquire. **Do not include** duplicate counts of serial titles. To the extent possible, report **all government document serials** even if housed in a separate documents collection. Verify the inclusion or exclusion of document serials. Exclude unnumbered

monographic and publishers' series. Electronic serials acquired as part of a bundle or an aggregated package should be counted at the title level, even if they are not cataloged, as long as they are made accessible by the library. If access is provided only through the overall platform or aggregator, do not report the individual titles but count the package as a single title.

Serial Titles Currently Purchased:

If in the case of consortial agreements, count under 'serial titles currently purchased' those titles for which the library pays any amount from its budgeted expenditures. Include all titles that are part of bundles or aggregated packages, even if your library makes a partial payment for access to those titles. **If a purchased title includes electronic access to the title, count that title ONLY ONCE (DEDUPED)** as electronic only. If a database includes full-text and abstracted titles, the number of full-text titles can be counted.

Public Services Form

Number of Library Presentations:

Presentations to Groups

Report the total number of sessions during the year of presentations made as part of formal bibliographic instruction programs and through other planned class presentations, orientation sessions, and tours. If the library sponsors multi-session or credit courses that meet several times over the course of a semester, each session should be counted. Presentations to groups may be for either bibliographic instruction, cultural, recreational, or educational purposes. Presentations both on and off the premises should be included as long as they are sponsored by the library. Do not include meetings sponsored by other groups using library meeting rooms. Do not include training for library staff. Please indicate if the figure is based on sampling. Report the number of presentations given by East Asian staff for instruction, orientation, or public relation purposes, including library tours. Sampling and/or estimation is acceptable.

Participants in Group Presentations

Report the total number of participants in the presentations. For multi-session classes with a constant enrollment, count each person only once. Personal, one-to-one instruction in the use of sources should be counted as reference transactions.

- 01. Library Presentations (Number of presentations)
- 02. Participants (Number of participants in presentations)

Reference transactions:

Report the total number of reference transactions. A reference transaction is an information contact that involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. The term includes information and referral service. Information sources include (a) printed and non-printed material; (b) machine-readable databases (including computer-assisted instruction); (c) the library's own catalogs and other holdings records; (d) other libraries and institutions through communication or referral; and (e) persons both inside and outside the library. When a staff member uses information gained from previous use of information sources to answer a question, the transaction is reported as a reference transaction even if the source is not consulted again.

If a contact includes both reference and directional services, it should be reported as one reference transaction. Include virtual reference transactions (e.g., e-mail, WWW form, chat). Duration should not be an element in determining whether a transaction is a reference transaction. Please indicate if the figure is based on sampling.

Report the total number of reference transactions handled in person, online or over the telephone.

- 03. Reference Transactions

Total circulation:

Count the number of **initial circulations** during the fiscal year from the general collection for use usually (although not always) outside the library. **Do not count renewals in the initial circulations**. Include circulations to and from remote storage facilities for library users (i.e., do **not** include transactions reflecting transfers or stages of technical processing.) Count the total number of items lent, not the number of borrowers.

Report total circulation for the fiscal year including initial transactions reported and renewal transactions. Exclude reserve circulations; these are no longer reported.

- 04. Total Circulations

Interlibrary loans:

Report the number of requests for material (both returnables and non-returnables) provided to other libraries and the number of filled requests received from other libraries or

providers. Include originals, photocopies, and materials sent by telefacsimile or other forms of electronic transmission. Include patron-initiated transactions. Exclude requests for materials locally owned and available on the shelves or electronically. Do not include transactions between libraries covered by this questionnaire.

Report the numbers of filled and unfilled requests provided to and received from other libraries. When appropriate, include document delivery statistics.
